

MAURICIO ARIAS

.NET Full Stack Developer

C# | .NET | Angular | TypeScript | SQL Server | Azure DevOps | REST APIs | CI/CD

mauricio.arias@outlook.com | linkedin.com/in/mauricio-arias-software | Medellín, Antioquia, Colombia

PROFESSIONAL SUMMARY

.NET Full Stack Developer with 11+ years of experience building, modernizing, and maintaining web, desktop, and mobile applications using .NET (C# and VB), ASP.NET, .NET Core, Angular, TypeScript, SQL Server, REST APIs, and Azure DevOps. Experienced in backend and frontend development, database integration, legacy migration, CI/CD, unit testing, Agile/Scrum, and remote collaboration with international clients. Specialist in Computer Security with domain experience in healthcare, logistics, inventory, and business operations. Authorized to work in Colombia and Italy (valid Italian residence permit).

CORE STRENGTHS

.NET | Angular | SQL Server | REST APIs | CI/CD | Healthcare Systems | Legacy Modernization | Systems Integrations

TECHNICAL SKILLS

- **Backend:** C#, .NET Core, ASP.NET, Visual Basic .NET, RESTful APIs, Web Services, NUnit, SOLID, OOP, backend services.
- **Frontend:** Angular, TypeScript, JavaScript, HTML, CSS, WebView2, WinUI 3, WPF, Xamarin.
- **Databases:** SQL Server, MongoDB, SQLite, stored procedures, data transformation, database normalization.
- **DevOps & Tools:** Azure DevOps, CI/CD pipelines, GitHub, SVN, Agile/Scrum, code reviews, pull requests, deployment pipelines.
- **Architecture & Integration:** REST APIs, service-oriented architecture, legacy modernization, API integration, HL7, AS/400.
- **Automation, Legacy & Security:** Python, Tkinter, Pandas, XlsxWriter, PowerBuilder, Computer Security.

PROFESSIONAL EXPERIENCE

Software Developer

BairesDev | 2025 – 2026

- Developed and maintained Windows desktop applications using C#, .NET Core, WinUI 3, RESTful APIs, and WebView2.
- Customized HTML, CSS, and JavaScript web controls to improve usability and integration within native Windows desktop applications.
- Implemented local persistence with MongoDB and SQLite for configuration, structured storage, and data access.
- Built Python desktop tools with Tkinter and automated data workflows using Pandas and XlsxWriter.
- Refactored legacy code to improve maintainability, readability, troubleshooting, and long-term application support.

Software Developer

Freelance | 2024 – 2025

- Delivered full-stack support across C#, Angular, TypeScript, database design, and application architecture.
- Built software projects applying OOP, SOLID principles, database normalization, clean code practices, and scalable design patterns to support maintainable solutions.

Software Developer

Endava | 2018 – 2023

- Developed and maintained enterprise desktop and web applications using Visual Basic .NET, C#, PowerBuilder, and SQL Server.
- Modernized legacy modules into service-oriented architecture, building healthcare integrations and interfaces using HL7 standards and .NET-based services.
- Maintained WPF applications with C# and developed, tested, and supported RESTful Web APIs using .NET Core, NUnit, and backend service patterns.
- Modernized frontend applications using Angular, TypeScript, JavaScript, CSS, and reusable UI components to improve maintainability and user experience.
- Managed source code, pull requests, and code reviews with GitHub, TFS, and supported CI/CD deployment pipelines using Azure DevOps.

Software Developer

Colanta | 2015 – 2018

- Developed ASP.NET web applications for logistics and inventory management, integrating SQL Server databases and business process workflows.
- Designed SQL Server queries, stored procedures, and data processing routines for large-volume data transformation, reporting, and operational analysis.
- Created integrations between .NET applications and AS/400 legacy systems to support enterprise data exchange and process automation.
- Built a Visual Basic .NET desktop application that consumed web services to query compliance-related databases and support secure business operations.
- Managed version control and collaborative development workflows using SVN.

TEACHING EXPERIENCE

College Professor

Tecnológico de Antioquia | 2019 – 2021

- Taught Software Construction 5 (Xamarin with C# and web services), Software Construction 1 (Basic Java), and Tendencies on Software Development (Markdown, Python, and R).
- Served as thesis advisor for software engineering students and advisor for professional internships.

Moodle Educational Platform Administrator

Tecnológico de Antioquia | 2013 – 2015

- Administration of the institution's Moodle virtual learning system on a Red Hat Linux server with an Apache web server and MySQL database, addition of custom modules for certifications, publication and maintenance of courses, faculty and student email lists, and customization of the platform's HTML, CSS, and JavaScript.

EDUCATION

Computer Systems Engineering

Politécnico Colombiano Jaime Isaza Cadavid | Medellín, Colombia | 2012

Specialist in Computer Systems Security

Tecnológico de Antioquia | Medellín, Colombia | 2018
